

Ratified: 19<sup>th</sup> September 2017

## Rationale

Head lice continue to cause concern and frustration for some parents, teachers and children. This school policy is intended to outline roles, responsibilities and expectations of the school community to assist with treating and controlling head lice in a consistent and coordinated manner.

## Aim

Whilst parents have the primary responsibility for the detection and treatment of head lice our school community will work in a cooperative and collaborative manner to assist all families to manage head lice effectively.

## Implementation:

### Parents/carers and families attending this school are expected to:

- Regularly inspect their child's hair for head lice
- Ensure that your child does not attend school with untreated head lice (in accordance with Health Infectious Diseases Regulations 2001);
- Notify the school if their child is found to have live lice and advise when appropriate treatment was commenced (in accordance with Health Infectious Disease Regulations 2001);
- Ensure that children with hair that falls lower than the shoulders will attend school with hair tied back;
- Maintain a sympathetic attitude and avoid stigmatising/blaming families who are experiencing difficulty with control measures;
- Act responsibly and respectfully when dealing with members of the school and broader community especially around issues of head lice;

### To support parents/carers and the broader school community to achieve a consistent, collaborative approach to head lice management the school will undertake to:

- Distribute up to date and accurate information on the detection, treatment and control of head lice to parents and staff at the beginning of the year or more frequently if required;
- Notify parents if a student in their child's class is found to have lice and is undergoing treatment
- Include information about head lice management in orientation and transition programs for new families/staff attending the school; Include information and updates in school newsletters;
- Include annual head lice updates for staff in-service programs;
- Provide practical advice and maintain a sympathetic attitude and avoid stigmatising/blaming families who are experiencing difficulty with control measures;
- Access community educational resources and support, such as primary school nurses, community health centres and local government;
- Abide by the recommendations of the School Exclusion Policy of the Health (Infectious Diseases) Regulations 2001 in that the responsibility to exclude a child from the school rests with the principal or person in charge;

- Only exclude children from school with live insects;
- Accept the advice of parents that appropriate treatment has commenced;
- Be aware of real difficulties some parents may encounter and seek extra support if required
- Encourage children to learn about head lice so as to help remove any stigma or 'bullying' associated with the issue;
- Act responsibly and respectfully when dealing with members of the school and broader community especially around issues of Head lice;
- Continue to seek opportunities to increase our collective understanding of and response to managing head lice.

**There is no requirement for any school to undertake 'head-lice inspection' programs. Le Page Primary School's principal may determine it is necessary to undertake such a program at any time. Should such a program be implemented the following will apply:**

- Any person employed by the school, or volunteering, to undertake 'head lice inspections' will adhere to the school policy and latest Department of Human Services information and Health (Infectious Diseases) Regulations 2001;
- Only the heads of children whose parents have given prior consent will be inspected;
- Respect the wishes of parents who elect not to participate in a school head lice check;
- If live insects are found parents will be phoned and requested to collect their children from school so as to not infect other students;
- All children inspected will be provided with a confidential report indicating to parents the results of the inspection as well as advice on the latest information regarding head lice;
- Families unable to manage treatment effectively will be provided with support service contact details and encouraged to seek additional assistance. Should financial support be required for treatment, funds from the Principal's Discretionary Budget may be allocated;
- Teachers and school staff may be requested to undergo an inspection.

## **Evaluation**

This policy will be reviewed by School Council as part of the school's three-year review cycle.
